

Information about the system of quality assurance - copy of the ISO quality certificate.

Tomice, August 2018

The BizeA - BIZON group has implemented a quality assurance system in accordance with PN-EN ISO 9001:2001 norm obtained in 2002. The constant development of the production of fasteners and the services rendered, has brought the expansion and relocation of the two companies in 2008 from Piaseczno to our new premises in Tomice near Warsaw.

The move allowed for the expansion of the BIZON production plant by the capability of producing wire which gives control over the entire production process of fasteners from the metallurgical raw material, to the end product, which includes staples, brads, pins and nails, putting us among a few companies in the world with this type of capability.

With the implementation of a modern ERP system and a warehouse for finished products with storage space for over 7 thousand pallets, together with a highly qualified staff ensures smooth functioning of the production, service and distribution processes.

Currently, we hold a certified quality assurance system in the extended range according to the requirements of the new ISO 9001:2015

PCBC has issued an IQNet recognized certificate that the organization:

BizeA Sp. z o.o.
and
BIZON INT Sp. z o.o.
ul. Europejska 4, 05-532 Baniocza
has implemented and maintains a
